

Better to elongate Disneyland Rail Line to Discovery Bay

New Policy Address announced by Mrs. Carrie LAM, Chief Executive of HK Government, on 10-10-2018 that to point out the Plan of so called, Lantau Tomorrow, that constructing an artificial Island close to Northeast Lantau, I do feel “so reserved” at least, or even opposed to reasonableness of the proposal!

Now, only <40% fully-used daily for Disneyland Rail Line, with 2 terminus stations Sunny Bay, & Disneyland Resort only amidst. The administration shall, undoubted fuller exploit it, for the prior area of future construction of more Public Housings!

For Sunny Bay Station, none Private residential properties nearby. Surely there shall be the 1st Choice, of building furthermore “snug” units of Home Ownership Scheme (HOS)!

And, be still quite far away for the Disneyland Resort Station, from Discovery Bay. If, taking elongation of the Disneyland Rail Line from present Terminus Disneyland Resort Station, to the large luxurious residential estate, so obvious it must be a fairly well initial new infrastructural blueprint! Along with the proposed new elongated rail-line (of Disneyland Line), if undertaking reclamation of smaller area at the site with shallower sea-depth, & connected with coast of the NE-Lantau Island, how it seems to be a scheme of more discerningly green “sustainable development” on, increasing land supply, for building Public Housing area?

After accomplishment of the elongation scheme of the rail-line, the new reclaimed land alongside, shall then be able for construction of the most numerous Public Housing units, be which “lower” marketing similarity with the luxurious private residential properties i.e. Discovery Bay, than flats of Home Ownership Scheme!

And as, there shall have populous local residents who live nearby, the HK-Disneyland shall cancel the Firework Display every night from that time. Can Laser, as an alternative be used for the grand show.

Deeply hope, Carrie LAM, CE shall temporarily postpone the plan of, more undiscerning plan constructing the artificial Island, Lantau Tomorrow Vision.
