

## **How many still wish to settle in even longer US' shutdown?**

Democracy is whatsoever, better than autocracy! From numerous stowaways from Iran partly, who even probably lost their lives, would still take high risk for migration to settle in UK, was undoubted a good example to it.

As for USA, even if under current federal shutdown of US administration now, this situation can still be said more obvious! Due to the strong will Donald Trump, President of USA on building Wall to separate between the border of, USA & Mexico. Why does USA intend to construct such barrier? Does Trump deliberate on “playing fun” at autocratic dictatorship to it? Certainly, just by reason of still too many people, who aspire to get the right of abode in US! ,,,
